

# ATC and You - Taking Your Flying to the Next Level

Do you know the impact your flight has on the ATC system? Many pilots don't realize how they are affecting the flow of air traffic but with a little knowledge, everyone can contribute to the safety and efficiency of the airspace system. This course will explore some misunderstood procedures and give a behind the scenes perspective that will help you make the most of your flying in controlled airspace. We will use IFR examples but the topics covered will benefit VFR pilots as well.

**Directions:** We Are Located Coss the Road From the Control Tower.

## A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to
